Relevant Experience

Washington and Lee University
Web Content Specialist

August 2025 - Present
Lexington, VA

- Manage and optimize university web content using CMS and CSS, improving accessibility, usability, and consistency across W&L webpages.
- Collaborate with university departments to build and update responsive webpages, implementing accessibility, design, and SEO improvements.

Mapfre | Webster, MA
IT Common Capabilities Engineering Intern

June 2026 - August 2026
Webster, MA

- Migrated enterprise RPA workflows from UiPath to AWS-based API services using Python, improving scalability and maintainability of insurance automation.
- Enhanced First Notice of Loss (FNOL) automation by implementing business and system exception handling, automated claim summaries, and test suites to improve reliability and production readiness.
- Built and deployed cloud infrastructure using AWS CDK and collaborated through GitHub and Jenkins CI/CD while supporting Guidewire ClaimCenter integrations.

Corporación Multi Inversiones (CMI)
IT Intern

June 2025 - August 2025
Dallas, TX

- Automated software deployment across 1,000+ endpoints using PowerShell, reducing downtime and improving deployment efficiency by 30%.
- Repurposed decommissioned servers, generating an estimated \$50K+ in hardware cost savings.
- Configured laptops, MDM devices, and AV systems for 200+ new hires, enabling same-day onboarding.

Washington and Lee University
Summer Research Assistant / Research Intern

June 2024 - September 2024
Lexington, VA

- Conducted hydrogeochemical research on arsenic contamination in the Ganges River using Python and PHREEQC groundwater modeling software.
- Developed computational workflows to analyze groundwater data and collaborated with researchers to troubleshoot sample inconsistencies.
- Presented findings at the Geological Society of America Annual Meeting to 1,000+ researchers, academics, and geoscience professionals.
